Vortex TR Aquatic™ Spreader

The Vortex TR Aquatic™ is a proven granular application system in the aquatic weed control industry. The unit is configured to perform with the most difficult to apply materials. The Vortex TR Aquatic™ is lightweight for use in small watercraft, equipped with a vibration system to insure continuous flow, configured to release minimal dust, moves the material well away from the boat or vehicle, can apply most granular materials on the market for aquatic weed control and has a large capacity hopper.

Specifications for the Vortex TR Aquatic™:

- Patented delivery system- U.S. Patent #6,883,736 #7,080,961 #7,137,579 Other patents pending
- All Stainless Steel frame
- 10 foot hose with Cordura cover for abrasion protection
- Vibration kit included to insure even flow of material in humid conditions
- Valve direct mount in hopper for even flow of material
- Valve configured for minimal dust release
- Up to 250 lb. capacity polyethylene inductor hopper
- Fully enclosed material storage to prevent material from becoming wet
- Up to 15 lbs. per minute granular application rate. Rate varies per material
- Fully adjustable valve for varied rate of material delivery
- Vortex TR Aquatic™ utilizes an Electronic On / Off flow control at delivery hose end, giving the operator the ability to be up to 10' from actual unit
- Lightweight System- approx. 95lbs
- Extension tubes included for longer delivery pattern
- Air boat compatible for water usage
- Easy clean-up with liquid soap and water
- Use Vortex TR Aquatic™ in a utility vehicle, pickup truck or boat
- Will apply mini prill, standard prill and large pellets
- One person operation
