Vortex TRW Aquatic™ Spreader

The Vortex TRW Aquatic™ granular application system is designed for the aquatic weed control industry. The unit is configured to apply materials using a water delivery system instead of air. The Vortex TRW Aquatic™ is lightweight for use in small watercraft, equipped with a vibration system to insure continuous flow, configured to release virtually no dust. The large capacity hopper and water delivery can achieve up to 50 lbs. of material delivery per minute.

Specifications for the Vortex TRW Aquatic™:

- Patented delivery system- U.S. Patent #6,883,736 #7,080,961 #7,137,579 Other patents pending
- All Stainless Steel frame
- Vibration kit included to insure even flow of material in humid conditions
- Valve direct mount in hopper for even flow of material
- Valve configured for minimal dust release
- Fully enclosed material storage to prevent material from becoming wet
- Fully adjustable valve for varied rate of material delivery
- Vortex TRW Aquatic™ utilizes electronic On / Off flow control
- Lightweight System- approx. 75lbs
- Air boat compatible for water usage
- Easy clean-up with liquid soap and water
- Use Vortex TR Aquatic™ in a utility vehicle or boat
- One person operation

6-foot wide boom w/ 2 or 4 outlets or hose

Rule 3700 GPH 12v pump

Manifold and boom flow adjustment

Vibration kit for continuous flow

2" manual valve
